## ***Annexure – A***

**Course Title: COMMUNITY PHYSIOTHERAPY AND REHABILITATION MEDICINE**

**Course Code: U21BPTT847**

**Total Hours: 120**

### **Course Description:**

This course is designed to integrate core concepts of community physiotherapy and rehabilitation medicine. It prepares students to work effectively in diverse community and clinical settings, addressing health promotion, disability prevention, physical rehabilitation, and the integration of physiotherapy into a multidisciplinary healthcare team. Students will gain in-depth knowledge of the socio-medical aspects of rehabilitation, aging, industrial health, orthotic/prosthetic prescription, and the challenges of architectural accessibility.

### **Course Objectives:**

Students completing this course will be able to:

1. Understand the physiological changes associated with aging and their implications on physical function.
2. Comprehend the national policies and legal frameworks supporting disability rehabilitation.
3. Identify, evaluate, and develop prevention and rehabilitation plans for different disabilities.
4. Implement and manage rehabilitation strategies in both urban and rural community settings.
5. Collaborate with healthcare teams and community resources to promote inclusive rehabilitation.
6. Apply physiotherapy techniques in managing various physical dysfunctions.
7. Prescribe and train the use of assistive technologies including orthotics, prosthetics, and mobility aids.
8. Assess and address architectural barriers impacting individuals with impairments.

### **Syllabus Outline**

| <b>Unit No.</b> | <b>Topics</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | <b>Didactic Hours</b> | <b>Practical Hours</b> | <b>Total Hours</b> |

### **SMVEC-College of Physiotherapy**

#### ***Institutional Review Board***

Chairperson (1)  
Member secretary (1)  
Members (3)

Communication address

#### **Purpose:**

The purpose of the standard operating procedure of IRB is to provide clear unambiguous instructions so that the related activities of the committee are conducted in accordance with ICMR and International ethical guidelines.

#### **Scope:**

This SOP covers the procedures of writing, reviewing, distributing IRB, SMVEC-SoP. and applicable only to SMVEC-SoP.

#### **Responsibility:**

##### **Responsibility of the Chairperson:**

- Appoint one or more IRB teams consist of a member secretary and two or more members with the knowledge of ethical process.
- Approve the submitted research proposal

##### **Responsibility of the IRB team:**

- Conduct meetings twice a year and analyses the submitted research proposal
- Propose modification, corrections if any
- Review the proposal
- Submit before the Chairman for approval

##### **Responsibility of the Member Secretary:**

- Assist the chairperson to constitute the board.
- Coordinate the meetings
- Schedule the presentations
- Maintain the register,
- Maintain the files about investigators
- Provide IRB clearance certificate to the investigator(s)

**SMVEC-College of Physiotherapy  
Institutional Review Board  
Format for the research proposal**

**1. Title of the Research Project :**

**2. Name of the Principal Investigator(s) :**

**Contact details :**

**3. Name of the Guide :**

**(a) Position :**

**(b) Contact details :**

**4. Study background and Rationale :**

**(Maximum of 1 Page)**

**5. Aims & Objectives :**

**6. Study Outcome :**

**7. Relevant review of literature :**

**(International and National status)**

**8. Methodology :**

Describe the detailed methodology to be implemented for each of your objectives; Mention the type of study, number of groups to be studied, sample size calculation along with inclusion and exclusion criteria. Mention the type of statistical analysis to be applied for the study interpretation.

**9. Timeline :**

**10. Investigators Declaration :**

We have read and agreed to comply with the procedures detailed in the document. All the relevant standard procedures will be adopted to conduct this study with the highest ethical standards.

We have read ICMR Guidelines, ICP-GCP Guidelines/CPCSEA Guidelines and other applicable Guidelines and we give an understanding that we will follow them strictly in performance of this study.

The study will be performed as per approved only. If any deviation is warranted, the same will be presented to the committee and permission will be sought.

We will give an undertaking that the study will be terminated immediately in case of any unforeseen adverse consequences and we will inform the same to the committee immediately.

## PROJECT WORK

**Placement** – Seventh & Eighth Semester

**Time:** 150 hours

**Course description:** This course is structured to enable the student to conduct/ participate in need-based research studies in various settings and utilize for conducting individual / group research project and submit a research report after completion of the study / work.

The project study shall be done by individuals or by group of individual students of the same class. The student should identify a problem area of relevance to the theory and / or practice of Physiotherapy to carry out an investigation of one aspect of that problem area, and to present a clear report on the process and results of the project work done.

The students are encouraged to identify problems of special interest to them that fall within the interest areas of Physiotherapy services, and to aim towards knowledge on the topic in the specified problem area.

The objective of this course is that at the end of the project / special study, the student will have developed skills critical thinking, research methods including formulation of a problem of study, review of literature, selection of a research design to investigate the problem, sampling and data collection, analysis of the data collected and presentation of information obtained.

After the completion of the study, project report should be submitted for evaluation at the end of the final examination of the course.

The internal evaluation shall be done objectively based on the candidate's attitude, involvement and the quality of work done for the study.

The internal evaluation marks shall be submitted by the respective project guide after the completion of the study / report.

The examiner appointed by the University at the final examinations shall do the external evaluation.

The internal evaluation of the project carries 50% of total marks of the project and the other 50% by the external evaluation.
